Have you heard rumors about the first cheese bar in Poland? Poznan's Fromażeria is said to be the first restaurant in the country serving cheese to its guests. They are accompanied by precisely selected liquors and additives emphasizing the uniqueness of each type. Cheeses are served with wines, beers and as part of the tasting menu. We can also find them as an ingredient in starters and main dishes, which can be ordered separately. It's tasty, friendly and professional. If you don't have time to visit, drop by for a set of cheeses and a bottle of wine to go. It's a great idea for a tasty evening at home or for an unusual gift for loved ones. An interesting, impressive interior completes the picture and makes a visit to Fromażeria a very interesting event.

In the summer of 2023, the restaurant was awarded the MICHELIN guide with the BIB Gourmand designation.
